Registration deadline March 18, 2025. No refunds or cancellations after this date.

Deiter Duff, MD is a native Missourian and forensic pathologist with 10 years of experience who has performed more than 2,500 postmortem examinations. He is the Medical Examiner for Greene County in Springfield, Mo. and formerly was Assistant Professor at the University of Missouri and a Medical Examiner for Boone and Callaway Counties. His undergraduate degrees are from Ozark Christian College in Joplin, Mo. as well as the University of Missouri-Columbia, and he went on to complete medical school and a pathology residency at the University of Missouri-Columbia. Dr. Duff's forensic pathology fellowship was in St. Louis.

Cases that Never Die: A Journey in Forensic Pathology

This will be a primarily case-based exploration of the practice of forensic pathology. Topics will include determination of cause and manner of death, toxicology, case discussions based on real death investigations, interpretation of autopsy findings, and the partnership between forensic pathologists and other specialists including forensic odontologists.

Course Objectives

1. Describe the role of forensic pathologists and how they work with forensic odontologists.
2. Define manners of death and explain how these manners are classified.
3. Discuss common causes of death.
4. Formulate questions and hypotheses during case discussions of death investigations.

Ms. Holly Cass is the forensic autopsy supervisor for Jackson County Medical Examiner's Office (JCMEO). She attended Columbia College in Columbia, Mo. where she earned a BS in Forensic Science focusing on post-mortem forensic practices, with a concentration in biology, minor in chemistry and a certificate in CSI. She has been with the Jackson County Medical Examiner's office since July 2014, as a Forensic Technician for three years and the Forensic Autopsy Supervisor for last 7+ years.

Functions within a Medical Examiner's Office by a Forensic Autopsy Supervisor

This presentation will encompass several cases Holly has worked with throughout her 10 years with JCMEO. She will show many different aspects of her job, including her responsibilities inside and outside the medical examiner's office. Attendees will learn about the differences between the coroner's office and the medical examiner's office. She will also explain when she needs to call in a forensic odontologist to help with the identification of the remains. This, like most forensic presentations, will have photography that is graphic in nature.
